

## GREEN CHEF

Green Chef was founded on a core value of stewardship, and required a partner to help them take meaningful action with regard to the climate change impacts of their operations.

*Terrapass has partnered with Green Chef since their inception to provide carbon offsets for every meal kit they have delivered.*

**HOW IT WORKS:** Carbon emissions associated with the delivery and preservation of food are being watched more closely than ever. Green Chef has taken a proactive approach to ensure that every single meal kit they ship has been balanced with carbon offsets from terrapass. All company aspects have been accounted for in this offset program - from the energy consumed to keep the food refrigerated to the exact number of miles that the kits travel to arrive on the customer's table.

**GREEN CHEF DOES MORE THAN OFFSET MEAL KITS:** All emissions from corporate travel are tracked and offset with the help of terrapass. Everything from the flight level data to hotel rooms and ground transportation is calculated to produce an accurate report.

### PROGRAM HIGHLIGHTS:

- ✓ More than 4,958 metric tons of carbon have been offset thus far, which is equivalent to saving 557,894 gallons of gasoline or 11,479 barrels of oil. <sup>1</sup>
- ✓ Renewable energy certificates for 5,745 Megawatt hours have been created which is equal to powering 708 homes for one year.<sup>1</sup>
- ✓ Flexibility to select specific carbon reduction projects based on corporate values of Green Chef.
- ✓ All Scope 1 (direct) & Scope 2 (indirect) emissions are currently being offset, as well as some scope 3 (corporate travel and outbound logistics).
- ✓ Green Chef has maintained this commitment to walk their talk right from the start, purchasing their first offsets following the initiation of operations in 2014.

### SUSTAINABLE PROJECTS SUPPORTED:

#### GreenTrees

The GreenTrees program aims to reforest at least one million acres in the Mississippi Alluvial Valley, the nation's largest watershed, covering approximately 25 million acres.

#### Capricorn Ridge

The Capricorn Ridge project avoids more than 952,000 metric tons of greenhouse gas emissions per year— equivalent to taking approximately 186,000 cars off the road (according to US Environmental Protection Agency methodology).

#### Grotegut Dairy Farm

An award winning, sustainable dairy operation located in Newton Wisconsin.
